Security Register.",
      "role": "AI Model Security Lead"
    }
  ],
  "name": "Sovereign AI Security & Model Governance Policy",
  "objective": "Establish a comprehensive framework for the secure development, deployment, and
oversight of AI models used in government and defense operations in Iran. The policy ensures
alignment with international standards, mitigates high impact AI risk
security and public trust.",
  "policy_id": "GEN-GOV-001",
  "policy_statements": [
    "All AI initiatives must be governed by the AI Governance Board and conform to NIST AI RMF,
OECD AI Principles, GDPR, and ISO/IEC 27001 requirements.",
    "AI model development shall include mandatory risk assessments, bias audits, adversarial
testing, and security reviews before production deployment.",
    "Personal data processed by AI systems must be handled in accordance with GDPR Articles 5,
6, 13, 17, 22, and 25, incorporating privacy by design and default.",
```

"AI systems shall maintain transparency through documented model provenance, explainability reports, and public disclosure of high impact deployments.",

"Any AI related incident, including model compromise, bias exposure, access, must be reported within 72 hours and managed under the organization's Incident Response Plan."

],

"procedures": [

{

"steps": [

"Appoint a multidisciplinary board comprising the Chief AI Officer, Data Protection Officer, AI Model Security Lead, and senior legal counsel.",

"Define the board charter, meeting cadence (monthly), and reporting lines to the Minister of Defense.",

"Document and publish the board's risk governance framework authority and escalation procedures."

],

"title": "AI Governance Board Establishment"

},

{

"steps": [

"Conduct a risk context identification (MAP 1.1) and stakeholder analysis (MAP 3.1) for each new model.",

"Perform adversarial robustness testing, bias detection, and data provenance verification; record results in the Model Security Register.",

"Obtain formal sign off from the AI Model Security Lead and the Chief AI Officer before moving the model to production.",

"Archive all testing artifacts and maintain version controlled copies for audit and legal purposes."

],

"title": "AI Model Development and Security Review"

},

{

"steps": [

"Detect and log any AI related security or ethical incident with the AI Security Center.",

"Initiate containment actions, notify the AI Governance Board, and trigger the AI Business Continuity Plan (BCP).",

"Notify affected data subjects and regulatory authorities within 72 hours as required by GDPR Art.33.",

"Perform root cause analysis, remediate vulnerabilities, and update policies (MEASURE 1.1) before resuming normal operations."

],

"title": "AI Incident Response and Recovery"

}

],

"review_cycle": "The policy is reviewed annually by the AI Governance Board and updated as needed to reflect changes in regulations, technology, or threat landscape.",

"scope": "Applies to all government and defense agencies, contractors, and subcontractors that design, train, deploy, maintain, or use AI/ML models handling classified, sensitive, or personal data within the Republic of Iran."
